Yi Wei

* Waterloo, ON | 548-990-3661 | y65wei@uwaterloo.ca | LinkedIn | whoisy1.online

Education

University of Waterloo — Jan 2025 – Present
Honours Bachelor of ***Computer Science*** — *Waterloo, ON*

Technical Skills

AI & Automation: Generative AI, LLM-based Applications, Prompt Engineering, Knowledge Base Platforms, Copilot Studio, Power Automate, ChatGPT, Gemini, n8n

Program Management: Roadmapping, Milestone Tracking, Stakeholder Communication, A/B Testing, SOP Documentation, Process Improvement

Programming: Python, Java, JavaScript, SQL, C, C++, Racket

Web, Backend & Tools: React, HTML, CSS, Spring Boot, Flask, PostgreSQL, Docker, Excel, Git, Linux, Figma, Wix Studio

Experience

AI Adoption Program Lead (Student Placement) — Sep 2026 – Present
YWCA Kitchener-Waterloo — *Kitchener, ON*

- Independently **configured, tested, and deployed 2 LLM-powered agent tools** for HR in Copilot Studio: a knowledge-base policy assistant that cites the source policy and routes personal questions to HR, and a human-in-the-loop resume pre-screener, refined through prompt engineering for reliability.
- Own **program management** of a **13-week**, organization-wide AI rollout, running the roadmap, timeline, and milestone tracking while **managing agent builds, payroll automation, and staff training in parallel**; track risks and blockers and keep executives aligned through regular status updates and escalations.
- **Partnered with 30+ stakeholders**, from the CEO and CFO to frontline staff, through interviews and group sessions to proactively surface organizational bottlenecks and **align leadership on a prioritized AI roadmap**.
- **Translated HR business requirements into technical solutions**: a payroll pre-check in Excel and Power Automate that catches wrong earning codes, missing approvals, and bad effective dates, aiming to save **10–15 hours** per payroll cycle.
- Executing **A/B testing** of prompt and knowledge-base variants in pilot, analyzing conversation data, user feedback, and system metrics to **improve AI tool accuracy and user experience**.
- **Trained non-technical staff** on AI tools by translating technical concepts into plain language, and wrote **SOPs and best practices** for AI system configuration and content management to ensure a clean handoff.

Web Design and Digital Marketing Intern — May 2026 – Aug 2026
WE Digital Bootcamp — *Waterloo, ON*

- Built responsive, accessible web interfaces using HTML, CSS, JavaScript, and Wix Studio.
- Evaluated how **generative AI systems** (ChatGPT, Gemini) surfaced a nonprofit client's information, interpreting search and site data to find gaps in event, membership, and rental content.
- **Communicated data-driven recommendations** to the client on site structure, SEO, and content organization to improve search visibility and AI discoverability.

Computer Science Teaching Assistant — Sep 2023 – Jul 2024
Zhineng Education — *Guangzhou, Guangdong*

- **Explained technical concepts in plain language** to **40+ students**, teaching control flow, OOP, and algorithms in Python and Java.
- Coached students through problem-solving and debugging in one-on-one sessions, and designed **15+** custom programming exercises.

Projects

Bee Population Modeling & Hive Placement Optimization | ***C++, Python*** — 2025

- Forecast bee populations with SVM models in Python, **evaluating model performance** with k-fold cross-validation.
- Fed forecasts into a C++ DFS backtracking solver under spatial and cost limits, producing a data-driven recommendation of **236** hives for a fixed plot.

Task Management REST API | ***Spring Boot, PostgreSQL, Docker*** — 2025

- **Architected a scalable** Spring Boot REST API, from endpoints down to the database schema, using PostgreSQL transactions to keep user and task records consistent.
- Added global exception handling and structured logging for faster debugging, and shipped the service in Docker.

Awards & Honors

picoCTF Global **Top 1.5%** (2023), USACO **Gold** Division (2023), Canadian Computing Competition Honour Roll (**Top 5%**, 2023), HiMCM Successful Participant (2023), AP Scholar with Distinction (2023, 2024)
